DETAILED ACTION

1. This is in response to the applicant's appeal brief filed 12/13/06.

REASONS FOR ALLOWANCE

2. After further search and thorough examination of the present application and in view of the Applicant's arguments, claims 14-22 and 25-26 are found to be in condition for allowance over the prior art made of record.
3. The following is an examiner's statement of reasons for allowance: Although the prior art of record teaches a system for reading package information includes an imaging system and a label decoding system, the imaging system captures an image of a package surface that includes a machine readable code such as a bar code (first readable information) and an alphanumeric destination address (second readable information), the second readable information is compared with samples of the second information in a database for validating the item, the prior art of record fails to disclose that the second readable information (human readable information is compared so as to enable or disable the item of equipment (i.e. the analyzer for the automatic analysis of chemical or biological specimens), wherein the item of equipment is a machine or device performing operations. These limitations in conjunction with other limitations of the dependent and independent claims were not shown by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
